PROFESSIONAL SUMMARY

I am Full-Stack Developer with experience in building web and mobile applications using React Native, React, Next.js, and Django. Passionate about creating reliable, user-friendly solutions and always eager to learn new technologies.

EDUCATION

- Riphah International University Faisalabad (2020-2024)
BS in Computer Science

TECHNICAL SKILLS

- . React-Native
- . React
- . Next.js
- . Django Rest Framework(DRF)
- . Firebase
- . WebSockets
- . Docker
- . CI/CD Pipeline
- . PostgreSQL
- . SQLite

AI & DEVELOPMENT TOOLS

- . Cursor
- . Claude
- . Google Antigravity

WORK EXPERIENCE

Full-Stack Developer | June 2025- April 2026

Valueans

- Built web and mobile applications using React Native, React/Next.js, and Django.
- Worked on new features, bug fixes, and performance improvements.
- Developed and integrated REST APIs with frontend applications.

React-Native Developer | Nov 2024- May 2025

Daira Engineering

- Built and maintained mobile applications using React Native.
- Developed new features and fixed bugs to improve app performance.
- Integrated REST APIs and Third-Party APIs connected the app with backend services and get live weather data.

PROJECT

Patient Records Management

Valueans

Developed a web portal using React and Python/Django for Hospital to manage branches and its patients records. Built the backend with Django REST Framework and PostgreSQL for secure storage, integrated agGrid for advanced data filtering and sorting, and used Material UI (MUI) for a fully responsive interface.

Document Generation & Template Management System

Valueans

Developed a document generation platform using Next.js, Tailwind, and Django with PostgreSQL. Built an admin driven template system with dynamic chapters and field selection for PDF generation. Added subscription based access control and document history tracking.

Horse Auction & Marketplace Platform

Valueans

Built a full-stack horse trading platform using React Native and Django with PostgreSQL. Implemented auction based listings where sellers post horses and buyers place real-time bids.

SmartFarm Irrigation App

Daira Engineering

Created a React-Native app enabling farmers to visualize farm layouts with React Native Maps and get real time and historical weather updates via a Weather API. Added Charts visualizations to display weather trends.
